There will be approximately 30 hours of video tapes provided in this review series. Each topic on the FE is important, but not all topics have the same number of questions on the exam. Therefore, we have structured the reviews to provide more material on the topics that have the greatest weighting on the exam.
VIDEO TAPES - 31 HOURS

Introduction - 1 hour
Math - 3 hours
Thermo - 3 hours
Statics - 3 hours
Dynamics - 3 hours
Strength of Materials - 3 hours
Engineering Economics - 2 hours
Engineering Ethics - 1 hour
Electrical Engineering - 3 hours
Study Strategies - 1 hour
Chemistry - 2 hours
Materials Science - 2 hours
Computers and Numerical Methods - 1 hour
Fluid Mechanics - 3 hours
WHO WILL PRESENT THE REVIEW SERIES

1. General Introduction to Fundamentals (1 hour) - Dan Turner
2. Thermodynamics (3 hours) - Dan Turner
3. Strategies for Taking the FE (1 hour) - Karen Butler
4. Ethics (1 hour) - Charles Harris
5. Strength of Materials (3 hours) - Lee Lowery
6. Engineering Economics (2 hours) - Lee Lowery
7. Statics (3 hours) - Lee Lowery
8. Dynamics (3 hours) - Ray James
9. Mathematics (3 hours) - John Weese
10. Computer and Numerical Methods (1 hour) - Bill Batchelor
11. Chemistry (2 hours) - Mark Holtzapple
12. Electrical Circuits (3 hours) - John Tyler
13. Materials Science (2 hours) - Richard Griffin
14. Fluid Mechanics (3 hours) - Ralph Wurbs
BENEFITS OF BECOMING A P.E.

- Consulting
- Added job opportunities
- Promotions
PE Licensure

FE - 1st Exam in the Process

After passing the FE, obtain the necessary experience as an engineering intern

P&P (Principles & Practices Exam) - 2nd exam in the process
REGULATIONS FOR BECOMING A P.E.

- Governed by State Registration

Boards of each state and U. S. Territories

- Requirements vary by State, but virtually all require passage of the FE and P&P
TYPICAL STATE REQUIREMENTS

- Graduate from an ABET-accredited, four year or five year program in engineering
- Passage of FE
- Obtain four or more years of applicable engineering experience
- Pass the P&P exam
- Ability to obtain registration in other state by reciprocity
EXAM ADMINISTRATION

The National Council of Examiners for Engineering and Surveying (NCEES) is the exam administrator. Volunteers from all over the U. S. help write the exams.

NCEES Address:

National Council of Examiners for Engineering and Surveying
P. O. Box 1686
Clemson, South Carolina 29633-1686
Phone: (864) 654-6824
Fundamentals of Engineering Exam

- 8 Hours Long
- Morning Session
  - 120 problems
  - multiple choice
  - 12 subject areas
- Afternoon Session
  - 60 problems
  - multiple choice
  - discipline specific - Chemical, Civil, Electrical, Industrial, Mechanical, and General
STATISTICS ON THE FE/EIT EXAM

- Approximately 40,000 take the FE exams each year

- Exams are given in April and October (generally)

- Pass rate is about 70% for all test takers

- Pass rate is above 80% for students graduating from ABET-accredited engineering programs
PASSING SCORE

- About 50%, i.e., a raw score of 120 pts. is generally enough to get you a scaled score of 70, the minimum passing point.
- Morning and afternoon points are added together.
### Fundamentals of Engineering Examination Format

Supplied Reference

The NCEES changed to a closed book, supplied reference format four years ago. The discipline-specific materials are included in the supplied reference as well. It is very important that you use the supplied reference in your preparation for the exam and know where materials are located, i.e., ME material is included in several different sections. You do not want to waste time searching for formulas during the exam.

Very Important!

PREPARATION FOR THE FE

1. Become familiar with the Supplied Reference that you will use in the exam.

2. Take the sample exams available from NCEES or various study books, and determine your areas of greatest strength (and greatest weakness!)

3. Set a goal of 60% competency (60% of questions answered correctly) on the sample exams.

(Remember: Passing scores are roughly 50%, i.e., 120 points out of 240 total points.)
HOW TO TAKE THE EXAM

1. Start with the subject areas you are strongest in, and work from strength to weakness.

2. Do not spend more than 3 minutes on any morning question or 5 minutes on a p.m. question (unless you are on the verge of a solution!). Go on to the next question and come back to this one.
3. About 15 minutes before the end of the session, go back to any questions you have skipped and spend about 10 minutes trying to answer questions.

4. At the 5-minute mark, fill in all unanswered questions. Go ahead and guess. There is no penalty for wrong answers! Make sure your multiple choice answer sheet is marked correctly.
